### **Notice to the Market**

**São Paulo, August, 31<sup>st</sup>, 2012.** Suzano Papel e Celulose (**Bovespa: SUZB5**) announces to the market that the company joined the following indexes: Bovespa Index ("Ibovespa") and Brazil Index 50 ("IBrX-50").

In the third preview of the new indexes portfolio, released today by the BM&FBovespa, Suzano joined the Ibovespa portfolio with a 0.671% weight, being the 48<sup>th</sup> stock in the index, and the IBrX-50 with a 0.182% weight, being the 47<sup>th</sup> most representative stock in the index.

#### **Ibovespa:**

"The Bovespa Index is the main indicator of the Brazilian stock market's average performance. Ibovespa's relevance comes from two facts: it reflects the variation of BM&FBOVESPA's most traded stocks and it has tradition, having maintained the integrity of its historical series without any methodological change since its inception in 1968."

#### **IBrX-50:**

"IBrX-50 is an index which measures the total return on a theoretical portfolio composed by 50 stocks selected among BM&FBOVESPA's most actively traded securities in terms of liquidity, weighted according to the outstanding shares' market value. This index was designed to serve as a benchmark for investors and portfolio managers, and also to allow the launching and derivatives (futures, options on futures and options on index). IBrX-50 has the same characteristics of Brazil Index - IBrX, which is composed by 100 stocks, but has the operational advantage of being more easily reproduced by the market."
